

# 1980-1981 CHECKPOINT/ANSIBLE FAN POLL — VOTING FORM

This form is distributed with *Ansible* and at Yorcon II; the poll covers fannish doings from just after Easter '80 to just after Easter '81. All fans may vote. *Ansible* is ineligible in the fanzine category. This year's experiment: Categories on the left are as before, 5 points being awarded for a first-place vote and so on to 1 point for a fifth-place vote. Categories on the right allow you up to three *unranked* nominations (like the Hugos, only different). It is considered naughty to vote for your own work. Please return your form (with optional news, TAFF donations, *Ansible* subscriptions etc.) to Dave Langford, 22 Northumberland Avenue, Reading, Berks, RG2 7PW, UK, by the deadline: SATURDAY 30 MAY 1981. Use a separate piece of paper for your votes if this one seems too precious...

XX

In case you don't remember it from last year, 'Worst Thing' is a wide-open category in which you may vote not only for your least favourite fanzines, writers, artists, issues, articles and covers, but also for conventions, happenings, personalities and abstract entities with some fannish connexion. Be spiteful! Details of individual ballots will remain confidential, but for my own sinister reasons I'd like the following information (and may arbitrarily tear up forms which fail to give it, so there):—

Name: \_\_\_\_\_

Address if you think I don't know it: \_\_\_\_\_
